

Simon Hartley is a Cybersecurity Practice Lead at IBM Consulting. He specializes in product security, connected vehicles, and automotive. Simon supports clients in cybersecurity, quantum safety, and AI, delivering compelling products with trust, safety, and security. He is an advisor to the SAE and contributor to their cybersecurity books.

Previously, Simon worked with Quantinuum to quantum harden US critical infrastructure. He successfully introduced a mobile security platform with CIS Mobile after working with Apple and Samsung to harden their platforms for US Government needs. Simon was a co-founder of automotive startup RunSafe Security, VP at startup Kaprica Security, and held executive roles with HP, Red Hat, and Capgemini.

Simon is a CISSP, with a BS in Physics, MS in Law & Cybersecurity, MBA, and a Purdue doctoral candidate in cybersecurity.
