

## *Our Vision*

We are a foundation established to support the National Cryptologic Museum in its effort to inform the public about the contribution made to the national security of the United States by the signals intelligence and information assurance services, and to commemorate the men and women who have participated in these important activities. Our objective is to help the Museum become the best institution of its kind in the world.

We will assist the Museum with advisory support and with the acquisition and display of memorabilia and artifacts that explain the role played by cryptology in peace and war. We will also aid the Museum in facilitating research into now-unclassified materials about signals intelligence and information assurance.

We will provide financial support to the Museum by seeking to attract both corporate and individual members to the Foundation. We will sponsor a variety of programs to expand and inform our membership and to increase interest and participation in the Museum and its development.

In all of our activities, we will proceed in accordance with the highest ethical standards and consistent with the requirements of a not-for-profit institution.
