

## **Cyndi Gula**

Managing Partner

Since 2017, GTA has invested in dozens of cyber start-ups and funds and supported multiple cyber nonprofits and projects. As GTA's Managing Partner, she helps our cyber start-ups scale and make important decisions about organizational structure, facilities, product licensing, customer support, recruiting strategy, culture, managing their cash flow, and having the processes in place to succeed and have fun. Cyndi also serves on the Board of Directors and Advisory Boards for GTA portfolio companies as well as some of the nonprofits we support.

Cyndi is a cyber start-up operations expert. She previously started and ran licensing, human resources, legal, facilities, accounting, marketing, channel, support and sales operations for both Tenable Network Security, which has a successful IPO in 2018, and Network Security Wizards, where she was President and helped it grow to a successful exit 18 months after being founded.

In addition to serving as an industry leader, Cyndi is also heavily involved in the Howard County, MD community. She served as the Chair of the Howard County Economic Development Authority Board, a Commissioner for the Howard County Equal Business Opportunity Commission, as a Trustee for Howard County General Hospital: A Member of Johns Hopkins Medicine, and on the board of the Howard County Conservancy.

In 2023, Cyndi was awarded a Gold Medal Order of Thor by the Military Cyber Professionals Association and later that year was also named as a NEW Power Women of DC Tech by DCA Live.
