

Dr. David Silberberg is the Chair of the Information Systems Engineering and the co-Chair of the Robotics and Autonomous Systems programs at the Johns Hopkins University School of Engineering for Professionals. He also teaches a Computer Science graduate course on Large-Scale Database Systems. Dr. Silberberg is a Principal Professional Staff member at the Johns Hopkins University Applied Physics Laboratory (APL) where he serves as the Chief AI Architect for the Cyber Operations Mission Area. In

the past, he was the Research Director of the Johns Hopkins University Institute for Assured Autonomy and he led the Large-Scale Analytics group at the APL focused on applying machine learning and AI-based algorithms to perform descriptive, predictive, and prescriptive analytics on large and complex data. Dr. Silberberg also served as chief architect for the deep archive of NASA mission data and for the Hubble Space Telescope data archive. Dr. Silberberg received Master's and Bachelor's degrees in Computer Science from the Massachusetts Institute of Technology and a Ph.D. in Computer Science from the University of Maryland, College Park.
