Daria Bahrami is a cybersecurity and emerging technology expert with extensive experience spanning both public and private sectors. As a technical advisor to DARPA's AI Cyber Challenge (AIxCC), she led AIxCC's programmatic and engagement strategy for a global competition to develop AI systems for automated vulnerability detection and remediation in open source software. The successful Semifinal Event at DEF CON drew over 14,000 visitors and garnered widespread media coverage from major outlets like The Washington Post and Fortune.

At Deloitte Global, she served as Lead Cyber Threat Intelligence Analyst, developing enterprise-wide browser security and vulnerability management solutions while delivering threat landscape briefings to C-suite executives. Her earlier role as Program Manager for Cybersecurity and Emerging Threats focused on critical infrastructure resilience and quantum technology policy. Bahrami's foundation in strategic partnerships was established at the National Geographic Society, where she cultivated multi-million dollar partnerships through compelling donor engagement strategies and impact reporting. Simultaneously, she maintained active involvement in the cybersecurity community as a Fellow for the Military Cyber Professionals Association and Communications Officer for the Cyber Security Forum Initiative.

Bahrami holds a degree from Georgetown University's School of Foreign Service, where she specialized in military, cyber, and space security policy.
