

**Gentry Lane**  
**CEO, CTO & Founder of Nemesis Global**

Gentry Lane is the CEO, CTO & Founder of Nemesis Global, a cyber national security software company that serves American and Allied militaries and critical infrastructure companies. She holds a DoD-appointed position to the NATO Science & Technology Organization tech panel on the cyber defense of military systems, is a Fellow at the National Security Institute at George Mason University's Antonin Scalia Law School and an International Fellow at the Democratic Resilience Center at Helmut Schmidt University in Hamburg. She also serves on the BOD of The Software in Defense Coalition.

Ms. Lane is a senior software developer, statistician, and scholar of military strategic logic and theory. She worked with Oak Ridge National Laboratory's National Security Department to develop groundbreaking discoveries in the fields of computational anomaly detection and memory forensics. Her current research and academic focus is on cyberpower projection theory.

A staunch STEMInist, Ms. Lane mentors young women interested in technology with national security applications and is a board advisor to deep tech startups. She is bilingual (English & French) and currently studying Polish.
