IBM BIO ALICE FAKIR

As the leader of IBM's Federal Cybersecurity Services practice, Alice is driving cybersecurity innovation through use of artificial intelligence and generative-AI capabilities to build resilience, advance defense postures and accelerate efficiencies in cyber defense operations across the cybersecurity domain.

Throughout her 20+ years developing cyber governance risk and compliance (GRC) solutions, executing large-scale IT transformation efforts, shaping cybersecurity policies and technologies for Fortune 100 companies, U.S. Gov't and International commercial entities, she has helped numerous clients drive transformation across their cybersecurity enterprise. Alice holds a Master's Degree in Technology Management from George Mason University and a master's certificate in Global Innovation Systems from University of Cambridge, UK, and is a published author and inventor of cybersecurity solutions.

Senior Partner and Vice President, IBM Cybersecurity Federal Practice Lead
